**Accès aux données**

```
Query query = Config.getInstance().getConnexionDefault();
ou
Query query = Config.getInstance().getConnexion("mysql");
...
String sql = "SELECT * FROM APP_USERS WHERE NAME_USER = 'toto'";
try {
    query.setSql(sql);
    query.select();
    ResultSet rs = query.getRs();
    while(rs.next()) {
        String username = rs.getString("NAME_USER");
    }
    query.close();
}
catch(SQLException e) {
    query.close();
    throw new Exception(e.getMessage());
}
```
